

**OBJECTIVE**

To seek a challenging role in an organization offering personal growth and career development. I like learning and applying new technology and sharing my knowledge with others. And, I truly enjoy working with team.

**PROFESSIONAL  
EXPERIENCE**

- **2.1** years of professional experience in the Information Technology industry primarily as an **Oracle PL/SQL developer**.
- Strong technical expertise in creating and maintaining database objects - **Tables, Views, Materialized Views, Indexes, Sequences**.
- Excellent skills in writing **PL/SQL Stored Procedures, Functions** and **Packages**.
- Expertise on **Ref Cursor, External Tables, Dynamic SQL, Collections** and **Exception handling**.
- Strong experience in **Cursor management, Exception Handling, Performance tuning** , and **optimization** of SQL statements using **Explain Plan, Indexing**, and **Hints**.
- Expertise in creating and maintaining **Table Partitioning, Collections** and **records, Analytical functions, Materialized Views, Query Re-Write**.
- Experience in **Extraction, Transformation, and Loading (ETL)** data from various sources into Data Warehouses and Data Marts using Data stage as ETL tool on Oracle.
- Experience in writing technical design **documents** and **developing unit test documents**.
- Combine with others, often with multidisciplinary teams, to achieve tasks/goals.
- Ability to be an effective team player and work under time constraints.

**EXPERIENCE**

**Software Engineer in Brandwidth Technologies Pvt. Lmt**  
**from 28-Apr-2021 to till date.**

**TECHNICAL  
EXPERTIES**

Database	Oracle 11G, 12C.
Tools	SQL Developer, JIRA , ServiceNow.
Language	SQL, PLSQL.
Operation System	Windows

## WORK HISTORY

### Project #1

Project Name	Core Claims.
Client	United Health Group.
Role	Oracle PL/SQL Developer.
Environment	SQL, PL/SQL, SQL DEVELOPER, JIRA, SVN.

### Roles

- Developed code with discussion from Front end users.
- Developed data model, SQL Queries, SQL Query tuning process and Schemas.
- Developed SQL and PL/SQL scripts to transfer tables across the schemas and databases.
- Involved in implementing the data integrity validation checks through constraints and triggers.
- Writing SQL reports and scheduling these reports from UNIX scripts.
- Worked on performance issues and used explain plan for tuning the queries.
- Developed Stored procedures, Functions, Packages and SQL Scripts using PL/SQL.
- Created SQL plus reports as per client's various needs and developed business objects.
- Developed SQL Scripts for Referential integrity check, which checks validity of incoming data with master tables in database.

### Project #2

Project Name	QMA.
Client	BDO
Role	Oracle PL/SQL Developer

### Roles

- Developed Stored Procedures, Functions, Packages and SQL Scripts using PL/SQL.
- Loaded the data into database tables using SQL\*loader from text and excel files.
- Developed data model, SQL Queries, SQL Query tuning process and Schemas.
- Created SQL\*plus reports as per client's various needs, and developed business objects.
- Developed SQL scripts for Referential Integrity check, which checks validity of incoming data with master tables in database.

## EDUCATION

- Nehru Memorial College - BSc.,2016 – 2019 6.9 (CGPA).
- Hindusthan College of Arts and Science – MSc., 2019 – 2021 8.2(CGPA).
